The Value of Radio Advertising

Reach across the region. Radio reaches around 17 million Australians each week, and in regional markets it remains a daily habit. Splitting your 677 spots evenly across 2EC Bega and Power FM gave Elders Batemans Bay coverage of both signals rather than one.

Trust that suits agency work. Local radio carries high trust in regional communities, which matters when the decision is listing a property or choosing a livestock agent. Sponsorship of a regular programme puts your name alongside content listeners have chosen, rather than in isolation.

Reaching people on the move. Audio reaches listeners in the car, at work and at home — including in the ute, the shed and the paddock. With 217 afternoon and 143 breakfast spots, your message travelled with landholders through the working day.

Sustained presence, not a burst. Property and livestock decisions are made over months, not days. Holding a steady schedule across 173 broadcast days from January to September kept Elders Batemans Bay front of mind through a full turn of the selling season.

Efficient cost of contact. Your effective cost per spot landed at \$22.51 against a published ratecard of \$53.00 — 58% below ratecard. That efficiency allowed a nine-month presence rather than a short, concentrated flight.

Summary & Recommendations

Across the campaign, Elders Batemans Bay aired 677 spots over 173 broadcast days for an investment of \$15,240.00 ex GST. You paid for 508 spots at \$30.00 each and received a further 169 spots at no charge, worth \$8,957.00 at ratecard. Total ratecard value of the schedule reached \$35,881.00, an ROI multiple of 2.35x on your investment, at an effective \$22.51 per spot.

- 1. Renew the sponsorship position.** Programme sponsorship delivered 33.3% more airtime than booked across nine months. Securing the same position for 2027 protects both the association and the rate before the next selling season opens.
- 2. Weight to key selling windows.** Delivery ran at an even 80 spots a month. Consider redistributing the same annual volume to lift weight around your busiest listing and clearance periods while holding a lighter base in quieter months.
- 3. Add drive-time weight.** Drive carried 117 spots, the lightest of the major dayparts. Increasing drive placement would catch landholders travelling home and complement the afternoon strength already built into the schedule.
- 4. Use tailored creative rotations.** With airtime this consistent, separate messages for rural property, livestock and farm supplies would keep the schedule fresh. We can rotate copy quarterly to match what is actually on your books.
